Introduction

Access Utilities (UK) Ltd, established in 2012, is a solution based consultancy. We provide bespoke services for all aspects of water treatment including, advice, design, installation and maintenance of water treatment systems for our customers Potable and Private water supplies.

Hybrid System

An alternative option to the ever increasing costs for our customer's using a Potable water supply. The Hybrid System is a Fully Funded borehole water supply, drilled on site and then treated to the standards that you require, typically providing savings in excess of 25% off your current water bills.

Private Water Supplies

We provide site surveys, accredited water testing, design, installation and servicing on all types of water treatment equipment for your Private Water Supply.

- Boreholes – Springs – Wells – Rivers -
