

If you rely on a **Private Water Supply** to provide water for your home or business then it's most likely that your water is being treated to ensure that it remains safe to use and consume. The **Private Water Supply Regulations** set stringent water quality standards in terms of the maximum mineral and bacterial contaminants allowed in your treated water supply and to ensure that these standards are maintained your water treatment equipment needs to be regularly serviced.

### *So what do Access Utilities offer?*

**Access utilities Ltd** has a new approach to maintaining your water treatment system, we specifically tailor our competitive maintenance plans to the needs of your premises, based on the quality and volume of the water needing treatment and the welfare needs of our clients using the water supply.

We offer you a free of charge no obligation site survey to discuss your needs, undertake water tests and then provide you with our tailored quotation for your new system if required or to maintain your existing system.

All water treatment companies will tell you that they are competitive, that they have fully trained staff, all work is guaranteed and sell only quality products.....**but isn't this what you would expect?** And yes, we provide the same, but our offer is unique and in terms of those unexpected costs or bills to maintain your water treatment system, well you won't have any as our **Water Sure Plus** product takes care of this.

### *What to do next?*

If you would like to know more about our products and services, simply call or email us with your enquiry.

### Water Sure Plus

A unique product in the Private Water Supply Market, where all your water treatment equipment, servicing and maintenance needs are covered by a simple monthly fixed payment for the duration of the contract. No hidden costs and for this, we promise to look after your system and water quality to give you piece of mind and provide you with safe water for your business or home from your Private Water Supply
